

# Modern Application Development - I Project Report

## 1. [Student details](#) -

- Student Name - Vishwas Sahai
- Student Roll No - 22F3002328

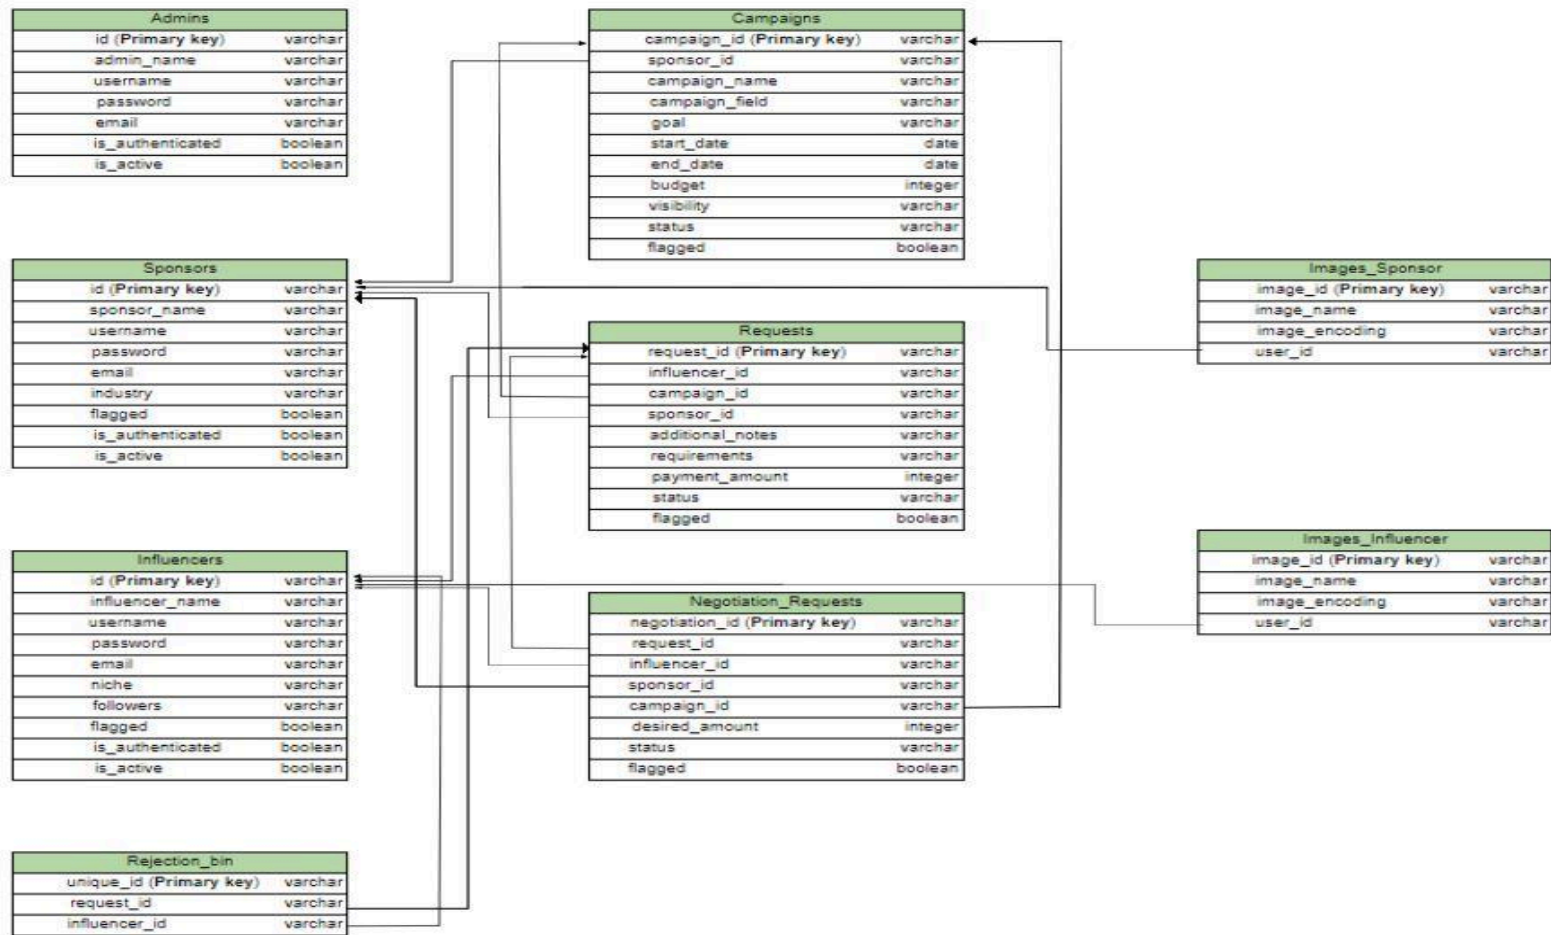

## 2. [Problem statement & approach](#) -

The problem statement this semester was the development of a Sponsor and Influencer engagement platform. I started with the MAD - I course lectures to help myself with the basics of Flask and SQLAlchemy. I made a rough sketch of the models to be created and their relationships with each other. Eventually, I defined the required routes and implemented the necessary functionality ensuring user privacy and data consistency.

## 3. [Frameworks & Packages / Libraries used](#) -

- Flask
- Flask\_Login
- Flask\_SQLAlchemy
- Chart.js

#### 4. [Database schema](#) -
